Counting of Somatic Cells with the NucleoCounter® SCC-100™

 A.I.A.	Silvia Orlandini from Laboratorio Standard Latte (Associazione Italiana Allevatori in Italy) finds that one the major benefits of the NucleoCounter® SCC-100™ is the fact that it is calibration free. You can read the full statement under 'References'.
	RM (Rannsóknarstofa Mjólkuridnadarins) is a central milk recording laboratory in Iceland. "It is difficult for a small laboratory, such as ours, to perform the necessary reference determinations to facilitate the high level of quality assurance required in a modern milk recording laboratory. The NucleoCounter® SCC-100™ is the ultimate solution since it allows us to establish reliable and stable determination of cell count in our pilot sample on a daily bases."
